

"Figuring Things Out"

FIGURUS

SOFTWARE

Specializing in custom software development, web development, CRM consulting, and other application development services, including AI implementation.

Goal is to help businesses modernize their digital operations to help improve efficiency which in turn increases production capacity.

figurus.com

Figurus + AI

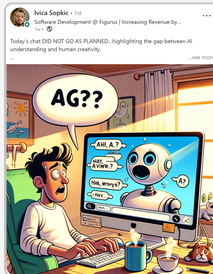

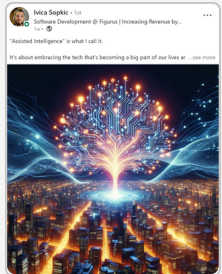

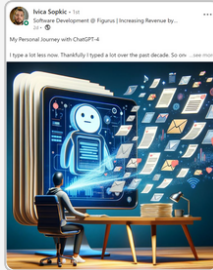

Experimenting with AI in various aspects to enhance efficiency and boost production capacity.

Key areas of focus include:

- **Reporting**: Reporting: Automate report generation with AI, identifying patterns, trends, and anomalies in data.
- **Enhancing Insights**: Leverage existing charts and pivot reports for deeper analysis and fresh perspectives. Streamline data collection to boost machine learning outcomes
- **Image Processing**: Enhancing output management with advanced vision models.
